Introduction xiii

CHAPTER 1

Lane-Keeping Behavior and Cognitive Load with Use of Lane Departure Warning 1

Introduction	2
Methods	3
Participants	3
Materials	3
Procedure	4
Data Processing & Analysis	5
Lane Keeping	5
Cognitive Load	6
Results	6
Lane Keeping	6
Cognitive Task Performance	7
Discussion	8
Contact Information	11
References	11

CHAPTER 2

Study on Test Scenarios of Environment Perception System under Rear-End Collision Risk 13

Introduction	14
Materials and Processing	15
Extraction of Real Naturalistic Traffic	
Rear-End Risk Scenarios	15
Study of Dangerous Level of Risk Scenarios	16
Methods	16
Environment Perception Elements (EPEs) Considered in Analysis	16

Probability Distribution of EPEs	17
Weather and Light Conditions	17
Road Features and Road Markings	18
Traffic Signs	18
Traffic Lights	19
Other Vehicles, Pedal Cyclists and Pedestrians	19
Others	19
Study of the Correlation between EPEs and Dangerous Level of Risk Scenarios	20
Generation of Test Scenarios for EPS	20
Results	21
Discussion	23
Conclusions	24
Contact Information	24
Acknowledgments	24
References	25

CHAPTER 3

Motion Planning of Vehicle Obstacle Avoidance in Complex Traffic Scenarios	27
Introduction	28
System Architecture	29
General Driving Risk Model	30
Collision Risk Model	30
Real-Time Collision Detection	30
Collision Risk	30
Non-Collision Risk Model	32
Violating Traffic Regulations Risk	32
Motion Planning and Control	33
Minimum Risk Search Algorithm	33
Experimental Results and Discussions	35
Experimental Scenarios	35
Results and Analysis	37
Conclusions	38
Contact Information	39
Acknowledgments	39
Abbreviations	39
References	39

CHAPTER 4

Driver Behavior While Operating Partially Automated Systems: Tesla Autopilot Case Study	43
Introduction	44
Methodology	45
Participants	45
Study Design	45
Journaling	45
Observation	45
Interview	45
Procedure	45
Results	46
Qualitative Data	46
Autopilot Understanding and Usage Situations	46
System Expectations	46
Initial Exposure	46
Effect of Autopilot Accident on Driver Behavior	46
Behavior Analysis	47
Eye Glance Analysis	47
Hands-On/Off Steering Wheel	50
On-Highway/Off-Highway Autopilot Usage	50
Tasks Performed While Autopilot Is Active	50
Summary/Conclusions	51
Study Limitations	51
References	51

CHAPTER 5

Forward Collision Warning: Clues to Optimal Timing of Advisory Warnings	53
Introduction	54
Methods	55
Sample	55
Procedure and Design	55
Measures and Statistical Analyses	56
Assessments of Functioning	56
Driving Performance Measures	56

Results	57
Summary/Conclusions	62
Contact Information	62
Acknowledgments	62
Definitions/Abbreviations	63
References	63

CHAPTER 6

Situation Awareness, Scenarios, and Secondary Tasks: Measuring Driver Performance and Safety Margins in Highly Automated Vehicles **65**

Introduction	66
Types and Levels of Automation	66
Failure Modes of Driver-Automation Interaction	67
Driving Simulator Protocol	68
Latent Hazards to Assess Situation Awareness	69
Secondary Task Engagement	70
Measures of Driver Performance and Safety Margins	72
Conclusion	72
Contact Information	73
Acknowledgments	73
References	73

CHAPTER 7

Frontal Collisions—What Are the Limitations of Future Forward-Looking Safety Systems? **77**

Introduction	78
Limitations of Current and Future Pre-crash Systems	78
One Dimensional Example	79
Moving to Two Dimensions	82
Limiting Trajectories and Sampling in between	84
What Are the Problems?	85
What Can Be Done	89
Summary/Conclusions	90
Contact Information	90
Definitions/Abbreviations	90
References	90

CHAPTER 8

Hardware-in-the-Loop (HIL) Implementation and Validation of SAE Level 2 Autonomous Vehicle with Subsystem Fault Tolerant Fallback Performance for Takeover Scenarios	93
Introduction	94
Hardware-in-the-Loop (HIL) Simulation	97
HIL Hardware	98
Engine Control Module (ECM)	98
Hybrid Control Module (HCU)	99
Gear Shift Module (GSM)	99
Transmission Range Control Module (TRCM)	100
Gateway Module (GWM)	100
Microautobox (MABX)	100
HIL Modeling	100
Automated Longitudinal Control	101
Automated Lateral Control	103
HIL SAE Level 2 Automation	106
Simulations and Test Results	110
Automated Longitudinal Control Simulations & Test Results	112
Automated Lateral Control Simulations & Test Results	114
Subsystem Faults and Fallback Performance Simulation & Test Results	116
Conclusions	119
Contact Information	122
Abbreviations	122
References	123

CHAPTER 9

Vehicle-GIS Assistant Driving System for Real-time Safety Speed Warning on Mountain Roads	127
1. Introduction	128
2. System Description	130
2.1 System Fundamentals	130
2.2 The Basic Structure of the System	130
2.3 Basic Process of the System	131

3. Modeling and Constraints	132
3.1 Designed Highway Speed Limit in Mountainous Area	132
3.1.1 Design Speed of Downhill Section in Mountainous Area	133
3.1.2 Highway Speed Limit	133
3.2 Vehicle Dynamics Modeling of Commercial Vehicles on Downhill	134
3.2.1 Ramp Brake Model	134
3.2.2 Weight Model	135
3.3 Brake Temperature Rise Model	137
3.3.1 Energy Analysis of Downhill Section	137
3.3.2 Analysis of Brake Temperature Rise	138
4. Case Studies and Simulations	138
4.1 The Main Parameters of the Target Vehicle Model	139
4.2 Safety Speed Simulation of Downhill Section	139
4.3 Influence of Vehicle Weight on Slope Top Safety Speed	143
4.4 Brake Temperature Rise Comparison	145
5. Conclusion	146
References	146
Definitions/Abbreviations	147

CHAPTER 10

Overtaking or Merging? Eco-Routing Decision and Speed Trajectory with Full Terrain Information	149
Introduction	150
Vehicle Dynamic Model	151
Optimization Constraints	151
Internal Constraints	151
External Constraints	152
Platoons Initial State	152
Overtaking Safety	152
Motion Planning Algorithm	153
Discrete Dynamic Programming (DP)	153
Introduction to DP	153
Forward Discrete DP	154
Cost Function	155

Model Predictive Control (MPC)and Linear Quadratic Regulator (LQR)	156
Linear Quadratic Regulator (LQR)	156
Model Predictive Control (MPC)	156
Simulation Results	157
Unconstrained Speed Trajectories vs. Uniform Motion	157
Constrained vs. MPC and LQR	157
One Preceding Platoon	158
Two Preceding Platoons	159
Three Preceding Platoons	161
Sensitivity Analysis	162
Influence of Initial Speed on Optimal Trajectories	162
Conclusion	163
Contact Information	164
Acknowledgments	164
References	164
Epilogue	167
