

# Table of Contents

About the Author	xi
Preface	xiii
Acknowledgments	xv

## CHAPTER 1

<b>Introduction to Accident Reconstruction</b>	<b>1</b>
<b>The Approach Used in Accident Reconstruction</b>	<b>2</b>
The Context of Reconstruction	2
Investigation and Analysis	2
Analysis by Phases	3
Theoretical and Empirical Modeling	4
Uncertainty Analysis	4
Incorporating Witness Statements and Testimony	6
Causation	8
Analyzing Avoidance Scenarios	10
<b>Physical Principles Used in Accident Reconstruction</b>	<b>11</b>
Conservation of Energy	11
Newton's Second Law and the Principle of Work and Energy	12
Principle of Impulse and Momentum (Conservation of Momentum)	18
<b>References</b>	<b>21</b>

## CHAPTER 2

<b>Motorcycle Characteristics</b>	<b>25</b>
<b>Motorcycle Types</b>	<b>26</b>
<b>Motorcycle Dimensions and Inertial Properties</b>	<b>31</b>
<b>Motorcycle Controls</b>	<b>37</b>
<b>Motorcycle Tires</b>	<b>38</b>
Motorcycle Tire Markings	38

Motorcycle Tire Friction Coefficients	40
References	41
<b>CHAPTER 3</b>	
Braking and Acceleration	43
Braking Dynamics	43
Braking Dynamics Example	46
Motorcyclist Braking and Deceleration Capabilities	48
Motorcycles with Integrated, Linked, and Antilock Braking Systems	57
Speed and Avoidance Calculations	60
Engine Braking	61
Motorcycle Acceleration Capabilities	62
Determining Speed Based on Gear	63
Case Study: Determining Speed Based on Gear	64
Motorcycle Autonomous Emergency Braking (MAEB)	67
References	67
<b>CHAPTER 4</b>	
Cornering, Swerving, and Changing Lanes	71
Analysis of a Motorcycle Traversing a Curve	71
Incorporating Roadway Superelevation	72
Example: Lean Angle Calculation	74
Assumptions	75
Case Study: Application of the Lean Angle Equations at the Apex of a Curve	76
Case Study: Application of the Lean Angle Equations in the Time Domain	81
Friction-Limited Speed	86
Geometric Limit on Speed	87
Willingness to Lean	90
Lane Change, Swerve, and Turn-Away	90
Example: Turn-Away and Swerve Calculation	96
References	97
<b>CHAPTER 5</b>	
Physical Evidence from Motorcycle Crashes	99
Scene Evidence	99
Skid Marks	101

Gouges, Scrapes, Scuffs, and Tire Marks	104
Site Inspection Checklist	106
<b>Evidence on the Motorcycle</b>	<b>107</b>
Motorcycle Inspection Checklist	110
<b>Damage to the Struck Vehicle</b>	<b>112</b>
<b>Evidence Documentation Methods</b>	<b>114</b>
Mapping with LIDAR	114
Photogrammetry	115
Camera Reverse Projection	119
Removing Lens Distortion	121
Case Study: Photogrammetric Analysis of Video of a Motorcycle Accident	123
Case Study: Photogrammetric Analysis of Video of Another Motorcycle Accident	129
Image-Based Scanning	132
Mapping with Small Unmanned Aerial Vehicles	138
<b>References</b>	<b>139</b>

## CHAPTER 6

<b>Sliding and Tumbling of the Motorcycle and Rider</b>	<b>143</b>
Decelerations for a Sliding or Tumbling Motorcycle	143
Decelerations for a Sliding or Tumbling Rider	150
Determining the Initial Speed for a Sliding Motorcycle or Rider	152
How to Calculate Speed Loss for a Sliding Motorcycle	152
<b>References</b>	<b>153</b>

## CHAPTER 7

<b>Motorcycle Falls</b>	<b>157</b>
<b>Low-Side Falls</b>	<b>157</b>
Case Study: A Low-Side Fall	158
<b>High-Side Falls</b>	<b>161</b>
Case Study: A High-Side Fall	162
Case Study: A High-Side Fall	164
<b>Falls Because of Front-Wheel Over-Braking and Lock-Up</b>	<b>166</b>
<b>Impact-Induced Capsize</b>	<b>167</b>

<b>Motorcycle Interactions with Potholes, Roadway Deterioration, and Debris</b>	<b>167</b>
A Motorcycle Encountering a Longitudinal Pavement Edge	167
A Motorcycle Encountering a Pothole	171
<b>Analyzing the Motion of Projected Riders</b>	<b>173</b>
<b>References</b>	<b>174</b>
<b>CHAPTER 8</b>	
<b>Motorcycle Collisions with Vehicles and Roadside Barriers</b>	<b>177</b>
<b>Analysis Based on Motorcycle Wheelbase Reduction</b>	<b>177</b>
<b>Determining Motorcycle Speed from the Struck Vehicle Postimpact Translation and Rotation</b>	<b>191</b>
Planar Impact Mechanics	191
Relating the Rotational Displacement to the Angular Velocity	196
Ogden and Kloberdanz Equation	203
<b>WREX 2016 Crash Tests</b>	<b>207</b>
Case Study: WREX 2016, Test #3	208
Case Study: WREX 2016, Test #5	212
Case Study: WREX 2016, Test #8	216
Case Study: WREX 2016, Test #11	220
Case Study: WREX 2016, Test #22	224
Case Study: WREX 2016, Test #23	227
Case Study: WREX 2016, Test #24	232
Discussion of WREX 2016 Tests	235
<b>How Much of the Rider's Weight Should be Included?</b>	<b>238</b>
<b>Impacts into Moving Vehicles</b>	<b>240</b>
<b>Motorcycle Collisions with Roadside Barriers</b>	<b>241</b>
<b>Motorcycle-to-Roadside Barrier Crash Tests</b>	<b>243</b>
Steel Guardrail: Upright	243
Concrete Barrier: Upright	245
Modified Steel Guardrail: Upright	245
Steel Guardrail: Capsized	246
Concrete Barrier: Capsized	246
Modified Steel Guardrail: Capsized	248
<b>References</b>	<b>248</b>

**CHAPTER 9**

<b>Event Data Recorders and Speedometers in Motorcycle Accidents</b>	<b>253</b>
<b>Event Data from the Struck or Striking Vehicle</b>	<b>253</b>
<b>Precrash Data</b>	<b>253</b>
<b>Crash Data (<math>\Delta V</math>)</b>	<b>254</b>
Potential Error Sources	255
Potential Magnitude of the Error—Longitudinal $\Delta V$	256
Potential Magnitude of the Error—Lateral $\Delta V$	260
<b>Accounting for Tire Forces When Incorporating EDR Data</b>	<b>261</b>
<b>WREX 2016 Test #3</b>	<b>262</b>
<b>WREX 2016 Test #5</b>	<b>266</b>
<b>Case Study #1: Utilizing EDR Data from the Passenger Vehicle</b>	<b>271</b>
<b>Case Study #2: Utilizing EDR Data from the Passenger Vehicle</b>	<b>282</b>
<b>Event Data from the Motorcycle</b>	<b>289</b>
<b>Video as a Source of Data from the Motorcycle</b>	<b>291</b>
<b>A Residual Speedometer Reading as a Source of Data from the Motorcycle</b>	<b>292</b>
<b>Case Study: Speedometer Testing on a 2019 Harley-Davidson Heritage Softail Classic</b>	<b>296</b>
<b>References</b>	<b>300</b>

**CHAPTER 10**

<b>Human Factors in Motorcycle Crashes</b>	<b>305</b>
<b>Physical Factors Affecting the Visibility of Motorcycles</b>	<b>306</b>
<b>Why do Drivers Sometimes Fail to “See” Motorcyclists?</b>	<b>309</b>
<b>The Size-Arrival Effect</b>	<b>316</b>
<b>Effectiveness of Daytime Running Lights on Motorcycles</b>	<b>318</b>
<b>The Perception-Response Process</b>	<b>321</b>
<b>Motorcyclists’ Responses to a Laterally Incurring Vehicle</b>	<b>325</b>
<b>A Numerical Example of the Left Turn Across Path Scenario</b>	<b>328</b>
<b>A More Nuanced Example</b>	<b>332</b>
<b>Evidence of Ambiguity in Path Intrusion Scenarios</b>	<b>333</b>
<b>Characteristics of Passenger Car Left Turns and Intersection Crossings</b>	<b>335</b>

<b>Are Training and Licensing Effective?</b>	<b>336</b>
<b>References</b>	<b>339</b>
<b>CHAPTER 11</b>	
<b>Visualization of Motorcycle Crashes</b>	<b>345</b>
<b>View from the Motorcyclist's Perspective</b>	<b>345</b>
Mounting Equipment on the Motorcycle	345
Mounting Equipment on the Operator	346
Mounting Equipment on Another Vehicle	347
<b>View of the Motorcycle from Other Vehicles</b>	<b>350</b>
<b>Camera Setup and Representing a Driver's View</b>	<b>351</b>
Camera Height	351
Field of View	354
Scaling the Images for Playback	355
<b>Computer Visualization of a Motorcycle Crash</b>	<b>356</b>
Case Study: CG Visualization of a Truck Versus Motorcycle Crash	359
<b>References</b>	<b>369</b>
<b>Index</b>	<b>371</b>
