

DIN CEN/TR 16690:2018-12 (E)

Electronic fee collection - Guidelines for EFC applications based on in-vehicle ITS stations; English version CEN/TR 16690:2014

Contents	Page
Foreword.....	5
Introduction	6
1 Scope	8
2 Normative references	8
3 Terms and definitions	9
4 Symbols and abbreviations	12
5 Context of C-ITS.....	13
5.1 Definition of C-ITS.....	13
5.1.1 Introduction	13
5.1.2 The European Commission basic definition.....	14
5.1.3 The vehicle active safety viewpoint.....	14
5.1.4 The CEN/ETSI/ISO definition	14
5.2 C-ITS role model and business architecture	15
5.2.1 Role model.....	15
5.2.2 Business architecture	17
5.3 Technical architecture.....	19
5.3.1 ITS Station architecture	19
5.3.2 ITS communication access technologies	20
5.3.3 Application provisioning and life cycle management.....	22
5.3.4 Security.....	23
5.4 Legal aspects and background	23
5.4.1 European action plan and directive for ITS	23
5.4.2 User privacy and data protection.....	24
5.4.3 Liabilities regarding application performance / suitability for use.....	24
5.5 Overview of standardization activities	24
5.5.1 Introduction	24
5.5.2 Basic set of ITS applications	25
5.5.3 CEN/TC 278/WG 16 on cooperative systems	26
5.5.4 ISO/TC 204/WG 18 on cooperative systems	26
5.5.5 ISO/TC 204/WG 16 on wide area communications/protocols and interfaces	27
5.5.6 ETSI Technical Committee on ITS (ETSI TC ITS).....	27
5.6 Overview of R&D projects and other relevant initiatives	27
5.6.1 CVIS project on cooperative vehicle infrastructure systems	27
5.6.2 SAFESPOT project on road safety related applications.....	28
5.6.3 eCoMove project on road transport efficiency applications	29
5.6.4 DRIVE C2X project with focus on field trials	29
5.6.5 Car-to-car communication consortium (C2C-CC)	29
5.6.6 EasyWay project on applications for the major EU road network.....	30
5.6.7 COMeSafety and COMeSafety2 projects on road safety applications	30
5.6.8 Amsterdam Group	30
6 Context of EFC	30
6.1 Definition of EFC	30
6.2 EFC role model and business architecture.....	31
6.2.1 Role model.....	31
6.2.2 Business architecture	32
6.3 Technical architecture.....	33
6.3.1 Overview	33
6.3.2 Communication architecture	35

6.3.3	Autonomous OBE / Front End implementation.....	36
6.3.4	EFC security.....	37
6.4	Additional major aspects.....	38
6.4.1	Interoperability.....	38
6.4.2	Value added services based on EFC OBE	38
6.4.3	EFC outside Europe	40
6.5	Legal aspects and background.....	41
6.5.1	Toll domain specific	41
6.5.2	European Electronic Toll Service (EETS)	41
6.5.3	User privacy and data protection	42
6.6	Overview of standardization activities	42
6.6.1	CEN/TC 278/WG 1 on Electronic fee collection and access control applications	42
6.6.2	ISO/TC 204/WG 5 on electronic fee collection and access control applications.....	42
6.6.3	ETSI Technical Committee for ITS (ETSI TC ITS).....	42
6.7	Examples of commercial projects	43
6.7.1	Small EFC system: Herrentunnel Lübeck (Germany).....	43
6.7.2	Nationwide EFC system: Germany	43
6.7.3	Interoperable EFC system: EasyGo	44
7	Outline of EFC requirements to an ITS Station	44
7.1	High level EFC requirements	44
7.2	Requirements for the EFC application(s).....	46
7.2.1	Detection of Charge Objects (autonomous toll domains).....	46
7.2.2	Provision of charge reports (autonomous toll domains)	47
7.2.3	Fee calculation (autonomous toll domains)	48
7.2.4	Generation of charge data (DSRC based toll domains)	48
7.2.5	Location support (autonomous toll domains).....	49
7.2.6	Support of enforcement application.....	49
7.2.7	Operation of an enforcement application	49
7.2.8	Changing variable tariff parameters	50
7.2.9	Feedback to the road user.....	50
7.3	Resulting requirements for the ITS Station	51
7.3.1	Technical requirements	51
7.3.2	Security requirements.....	55
7.3.3	Operational requirements	58
8	EFC services in the C-ITS environment	60
8.1	EFC services on ITS Stations.....	60
8.2	Involved C-ITS sub-roles in the life cycle of EFC services	61
8.2.1	Life cycle of EFC services	61
8.2.2	C-ITS sub-roles involved in different phases of the EFC service life cycle	62
8.3	Combined models of EFC services in C-ITS context.....	66
8.3.1	C-ITS and EFC role model relations	66
8.3.2	Technical EFC architecture in C-ITS context.....	68
8.3.3	ITS Station Service Provider	70
8.3.4	Extended EFC role model in C-ITS environment	70
8.3.5	Business architecture	71
9	Considerations on particular implementation aspects	72
9.1	Introduction.....	72
9.2	Synergies.....	73
9.3	Particular and critical areas in relation to EFC in an ITS environment.....	74
9.3.1	Phase of migration from dedicated EFC devices to ITS-S based EFC	74
9.3.2	Resource management	77
9.3.3	Performance monitoring.....	80
9.4	Suitability for use and certification	81
9.4.1	Introduction.....	81
9.4.2	Conformity to specifications	82

9.4.3	Suitability for use tests	83
9.4.4	Certification	83
9.4.5	Registration and Certification Authority	84
9.4.6	Quality system approval und surveillance.....	85
9.5	Governance and responsibility	85
9.5.1	Introduction	85
9.5.2	Application configuration of the ITS Station	86
9.5.3	Technical implementation of the ITS Station	87
9.5.4	Update and installation of applications.....	88
10	Guidelines for further work.....	89
10.1	Role of EFC to boost the deployment of C-ITS.....	89
10.2	Actions to reduce barriers for the deployment of EFC applications — Create harmonized certification and test rules	90
10.2.1	Introduction	90
10.2.2	Issuing test rules	90
10.2.3	Guidelines on certification and tests.....	91
10.3	Recommendations for further standardization activities	91
10.3.1	Recommendations with regard to the area of EFC	91
10.3.2	Recommendations with regard to the area of (C-)ITS.....	93
10.4	Best practice	94
Annex A (informative) Security Considerations.....		95
A.1	Introduction	95
A.1.1	Security areas and targets.....	95
A.1.2	System and application availability and reliability.....	95
A.1.3	Data security	95
A.1.4	User privacy protection.....	96
A.2	Security scope of this annex	96
A.3	General EFC security considerations.....	96
A.3.1	Security analysis.....	96
A.3.2	Security system	98
A.3.2.1	General.....	98
A.3.2.2	Technical security architecture	98
A.3.2.3	Organisational security architecture	98
A.4	System and application availability and reliability.....	99
A.5	Security of an ITS Station	100
A.5.1	General.....	100
A.5.2	Closed ITS Station application platform	100
A.5.3	Open ITS Station application platform	101
A.6	Summary.....	101
Bibliography		102
