

DIN EN ISO 12216:2023-02 (E)

Small craft - Windows, portlights, hatches, deadlights and doors - Strength and watertightness requirements (ISO 12216:2020 + Amd 1:2022) (includes Amendment :2022)

Contents	Page
European foreword.....	4
Ⓐ European foreword to Amendment A1 Ⓐ 5	5
Ⓐ Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2013/53/EU aimed to be covered Ⓐ 6	6
Foreword	7
Ⓐ Foreword to Amendment 1 Ⓐ.....	9
1 Scope.....	10
2 Normative references.....	10
3 Terms and definitions	10
3.1 General definitions of openings and their coverings	11
3.2 Devices covering an opening.....	11
3.3 Plate of an appliance.....	11
3.4 Specific appliances.....	12
3.5 Areas definition	13
3.6 Plate end-connections	15
3.7 Types of glass.....	15
3.8 Watertightness.....	15
3.9 Other general definitions	16
4 General requirements	18
4.1 Requirements of other International Standards	18
4.2 Strength of appliances.....	18
4.3 Watertightness of appliances	18
4.3.1 Minimum degree of watertightness	18
4.3.2 Additional requirements for appliances related to watertightness.....	18
5 Plate materials	19
5.1 General.....	19
5.2 Acrylic sheet materials.....	19
5.3 Glass.....	19
5.3.1 Restrictions of usage	19
6 Specific requirements of appliances	19
6.1 Plate end connection and location.....	19
6.1.1 Simply supported plates.....	19
6.1.2 Semi-fixed plates	20
6.2 Fastening requirements	20
6.2.1 Fastening of plates and frames.....	20
6.2.2 Fastening of semi-fixed plates	21
6.2.3 Fastening of glued plates.....	21
6.2.4 Stiffeners and attachments.....	21
6.3 Special requirements.....	21
6.3.1 Appliances fitted in area I	21
6.3.2 Appliances fitted in area IIa	23
6.3.3 Flush deck companionway opening sill heights.....	24
6.3.4 Sliding appliances	25

6.3.5	Washboards	26
6.3.6	Securing system	26
6.3.7	Deadlights	26
6.3.8	Multihull escape hatches	26
6.3.9	Prefabricated appliances	27
6.3.10	Appliance systems (composite appliances).....	27
7	Strength assessment.....	27
7.1	Assessment methods for appliances strength.....	27
7.2	Monolithic plates — Direct calculation methods.....	27
7.2.1	Monolithic semi-fixed plates — Direct calculation method.....	27
7.2.2	Selection of monolithic plate thickness.....	28
7.2.3	Plate aspect-ratio coefficients, k_r and k_f	29
7.2.4	Design pressure.....	30
7.2.5	Pressure reduction factor.....	30
7.2.6	Curvature coefficient.....	30
7.2.7	Flexural strength and modulus of elasticity	31
7.2.8	Safety factor and minimum plate thickness.....	31
7.2.9	Monolithic simply supported on 2 sides — Direct calculation	32
7.2.10	Monolithic simply supported on 3 sides — Direct calculation	32
7.3	Laminated glass — Direct calculation.....	33
7.4	Advanced calculation method.....	34
7.5	Pressure test assessment method	34
Annex A	(informative) Location areas of appliances above W_{LREF}	35
Annex B	(informative) Types of plate edge connection	37
Annex C	(normative) Unsupported plate dimensions.....	39
Annex D	(normative) Test methods.....	41
D.1	General	41
D.2	Pressure and watertightness tests	41
D.2.1	Pressure test for watertight appliances (watertightness degree 2)	41
D.2.2	Watertightness tests.....	42
D.3	Test or calculation for mechanical links	44
D.4	Gluing tests.....	45
D.4.1	General	45
D.4.2	Inside pressure test	45
D.4.3	Separation test.....	46
Annex E	(normative) High-impact-resistance glass	48
Annex F	(informative) Precalculated tables	49
F.1	Mechanical properties of typical materials	49
F.2	Use of pre-calculated tables.....	49
Bibliography	79
