

DIN EN ISO 21645:2021-09 (E)

Solid recovered fuels - Methods for sampling (ISO 21645:2021)

Contents	Page
European foreword	4
Foreword	5
Introduction	6
1 Scope	8
2 Normative references	8
3 Terms and definitions	9
4 Symbols	14
5 Principle	15
6 Development of a sampling plan	15
6.1 Principle	15
6.2 Definition of overall objectives	16
6.3 Definition of a lot and determining lot size	16
6.3.1 General	16
6.3.2 Definition of a lot in case of sampling from a material flow	17
6.3.3 Definition of a lot in case of transport by a vehicle	17
6.3.4 Definition of a lot in case of transport by ship	17
6.3.5 Definition of a lot in case of sampling from a static lot	17
6.4 Determination of the sampling procedure	17
6.5 Determination of the number of increments	18
6.6 Determination of minimum sample mass	18
6.7 Determination of the minimum increment mass	18
6.7.1 Determination of minimum increment mass for material flows	18
6.7.2 Determination of the minimum increment mass for static lots, vehicles or ships	18
6.8 Determination of the planned increment and planned sample amounts	18
6.9 Selection of distribution of increments over a lot	19
6.9.1 General	19
6.9.2 Determination of the distribution of the increments when sampling from a material flow ..	19
6.9.3 Determination of the distribution of the increments when sampling from a vehicle(s) ..	19
6.9.4 Implementation of sampling from a static lot	20
6.10 Sampling equipment and implements	21
7 Implementation of the sampling plan	21
7.1 Steps before actual sampling	21
7.2 Steps during sampling	21
7.3 Steps after sampling	21
8 Handling and storage of samples	22
9 Precision	22
Annex A (normative) Procedure for the development of a sampling plan	23
Annex B (normative) Sampling plan	26

Annex C (informative) Example of a sampling plan	30
Annex D (normative) Sampling equipment and implements	35
Annex E (normative) Determination of minimum sample mass	40
Annex F (normative) Determination of increment mass for sampling from material flows	45
Annex G (normative) Determination of increment mass for sampling from static lots, vehicles or ships	48
Annex H (normative) Implementation of sampling plan from a material flow	49
Annex I (normative) Implementation of the sampling plan from a static lot or vehicle	53
Annex J (normative) Minimum sample mass required for analysis	55
Annex K (informative) Additional information about precision	58
Annex L (informative) Examples for stratified and stratified random sampling	61
Bibliography	63
