

# DIN 32877-2:2021-07 (E)

## Geometrical product specification (GPS) - Dimensional measuring equipment: Optoelectronic measurement of length - Part 2: Design characteristics and metrological characteristics for backward scattering measuring principles

---

### Contents

Page

Foreword .....	4
Introduction .....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions .....	7
4 Symbols and abbreviated terms .....	16
5 Design characteristics .....	16
6 Metrological characteristics .....	17
6.1 Maximum permissible measurement error (MPE) .....	17
6.2 Limit values of further metrological characteristics (MPL) .....	17
6.3 Rated operating conditions .....	18
6.3.1 Reference measuring system .....	18
6.3.2 Temperature .....	18
6.3.3 Warm-up time .....	18
6.3.4 Parameters of the optoelectronic length measuring device .....	18
6.3.5 Further conditions .....	19
6.4 Test method .....	19
6.4.1 General .....	19
6.4.2 Linearity deviation (limited by $E_{lin}$ ,MPE) .....	19
6.4.3 Temporal repeatability and spatial repeatability (limited by $R_{temp}$ ,MPE and $R_{spatial}$ ,MPE) .....	21
6.4.4 Step response time with respect to changes in the measurand (limited by $t_{response}$ ,MPL) .....	22
6.4.5 Setting time with respect to changes in the measurand (limited by $t_{value}$ ,MPL) .....	23
6.4.6 Limit frequency with respect to changes in the measurand (limited by $t_{value}$ ,MPL) .....	23
6.4.7 Limit frequency with respect to changes in the received radiant power (limited by $f_{flux}$ ,MPL) .....	24
6.4.8 Limit tilt (limited by $tilt$ ,MPL) .....	24
6.4.9 Axial optical resolution (limited by $z_{resolution}$ ,MPL) .....	24
6.4.10 Dynamic range of the received radiant power during a single measurement (limited by $SNR_{flux}$ ,MPL) .....	25
6.4.11 Proof of conformity with the metrological specifications .....	26
Annex A (informative) (Measurement) standards .....	27
A.1 General .....	27
A.2 Design characteristics .....	27
A.2.1 Standard 1 for testing the linearity deviation and repeatability .....	27
A.2.2 Standard 2 for testing the linearity deviation and repeatability .....	27
A.2.3 Standard 3 for testing the linearity deviation and repeatability .....	27
A.2.4 Standard 4 for testing the step response time, the setting time and the limit frequency with respect to changes in the measurand .....	28

A.2.5	Standard 5 for testing the step response time, the setting time and the limit frequency with respect to changes in the measurand .....	28
A.2.6	Standard 6 for testing the step response time, the setting time and the limit frequency with respect to changes in the measurand .....	28
A.2.7	Standard 7 for testing the limit frequency with respect to changes in the received radiant power .....	29
A.2.8	Standard 8 for testing the limit frequency with respect to changes in the received radiant power .....	29
A.2.9	Standard 9 for testing the limit tilt .....	30
A.2.10	Standard 10 for testing the axial optical resolution .....	30
A.2.11	Standard 11 for testing the dynamic range of the received radiant power during a single measurement .....	31
A.3	Application .....	32
A.4	Test set-up .....	34
Annex B (informative) Data sheet requirements .....		35
Bibliography .....		37
Figures Figure 1 -- Measurement corridor for the triangulation measuring principle .....		9
Figure 2 -- Measurement corridor for the confocal chromatic measuring principle and the absolute interferometric measuring principle .....		10
Figure 3 -- Step response time and setting time for an abrupt change in the measurand .....		11
Figure 4 -- Testing of the axial optical resolution by simultaneous distance measurements to the front and back of a partially transparent test object .....		13
Figure 5 -- Testing the dynamic range of the received radiant power during a single measurement by simultaneous distance measurements to the front and back of a partially transparent test object .....		15
Figure 6 -- Schematic representation of the method of testing linearity deviation, temporal repeatability and spatial repeatability .....		20
Figure 7 -- Diagram of the linearity deviation, the temporal repeatability and the spatial repeatability .....		21
Figure A.1 -- Schematic representation of standard 11 .....		31
Figure A.2 -- Schematic representation of a possible set-up for testing linearity deviation, temporal repeatability and spatial repeatability .....		34
Tables Table 1 -- Abbreviated terms .....		16
Table A.1 -- Application of the standards .....		32
Table B.1 -- Design characteristics of optoelectronic length measuring devices .....		35
Table B.2 -- Metrological characteristics of optoelectronic length measuring devices .....		36
