

# DIN EN 15427-1-1:2022-06 (E)

## Railway applications - Wheel/Rail friction management - Part 1-1: Equipment and Application - Flange Lubricants

---

Contents	Page
European foreword .....	4
Introduction .....	5
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions .....	6
4 General .....	7
4.1 Purpose of equipment .....	7
4.2 Application of lubricant .....	8
5 Requirements for trainborne equipment .....	8
5.1 General .....	8
5.2 Design of trainborne equipment .....	9
5.3 Installation of trainborne equipment .....	10
5.4 Operations, inspection and maintenance .....	10
5.5 Application .....	10
5.6 Verification .....	11
6 Requirements for trackside equipment .....	12
6.1 General .....	12
6.2 Design of trackside equipment .....	12
6.3 Installation of trackside equipment .....	13
6.4 Operations, inspection and maintenance .....	13
6.5 Application .....	13
6.6 Verification .....	15
Annex A (informative) Types of trainborne and trackside equipment .....	16
A.1 Introduction .....	16
A.2 Trainborne equipment .....	16
A.2.1 Fluid lubricant application to the active interface .....	16
A.2.2 Solid lubricant application to the wheel .....	16
A.3 Trackside equipment .....	16
A.3.1 Mechanically activated .....	16
A.3.2 Hydraulically activated .....	16
A.3.3 Electrically activated .....	16
Annex B (informative) Guidance on approvals testing and verification .....	17
B.1 General .....	17
B.2 Process for system verification .....	18
B.2.1 Baselineing .....	18
B.2.2 Approvals testing .....	18
B.2.3 Measuring effectiveness .....	18
Annex C (informative) Lubricant product performance - Field assessment .....	19

C.1	<b>General .....</b>	19
C.2	<b>Product performance assessment .....</b>	19
C.3	<b>Monitoring .....</b>	20
C.4	<b>Outcome of trial .....</b>	20
<b>Annex D (informative) Guidance on verification and optimization of the application system .....</b>		21
D.1	<b>General .....</b>	21
D.2	<b>Trainborne equipment .....</b>	21
D.3	<b>Trackside equipment .....</b>	21
D.4	<b>Assessing the lubrication condition of rail or wheel (adhesive tape impression) .....</b>	22
<b>Annex E (informative) Installation and maintenance good practice for trainborne equipment .....</b>		25
E.1	<b>Reasons for installing trainborne equipment .....</b>	25
E.2	<b>Positioning of applicator .....</b>	25
E.3	<b>Information for maintenance of spray nozzles .....</b>	27
E.4	<b>Information for maintenance of sticks .....</b>	28
<b>Annex F (informative) Installation and maintenance good practice for trackside equipment .....</b>		30
F.1	<b>Selecting locations for trackside equipment .....</b>	30
F.2	<b>Determination of applicator position .....</b>	30
F.3	<b>Inspection and maintenance .....</b>	31
F.4	<b>Records .....</b>	31
<b>Bibliography .....</b>		32
