

# DIN 32676:2022-10 (E)

## Stainless steel components for hygienic and aseptic applications in the food, the chemical and the pharmaceutical industries - Clamp connections with molded seals

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
1	Scope .....	7
2	Normative references .....	7
3	Terms and definitions .....	8
4	Symbols and abbreviations .....	8
5	Ordering details .....	9
5.1	Clamp ferrules .....	9
5.1.1	Required details .....	9
5.1.2	Optional details .....	9
5.1.3	Designation .....	9
5.1.4	Examples of orders .....	9
5.2	Solid end caps .....	9
5.2.1	Required details .....	9
5.2.2	Optional details .....	10
5.2.3	Designation .....	10
5.2.4	Examples of orders .....	10
5.3	Gaskets .....	10
5.3.1	Required details .....	10
5.3.2	Optional details .....	10
5.3.3	Designation .....	11
5.3.4	Examples of orders .....	11
5.4	Clamp connection .....	11
5.4.1	General .....	11
5.4.2	Required details .....	11
5.4.3	Optional details .....	11
5.4.4	Designation .....	11
5.4.5	Examples of orders .....	12
6	Dimensions .....	12
6.1	General .....	12
6.2	Clamp ferrules .....	13
6.3	Gaskets .....	14
6.4	Solid end caps .....	15
6.5	Clamp connection .....	16
7	Material .....	21
7.1	Metallic materials .....	21
7.2	Gasket materials .....	21
8	Tolerances .....	22
9	Surfaces .....	22
9.1	Internal and external surface finish .....	22
9.2	Acceptance criteria for visual testing .....	23
10	Marking .....	25

11	Testing and documentation .....	25
11.1	Testing .....	25
11.2	Documentation .....	26
12	Packaging .....	26
Annex A (normative) Information on the requirements on elastomer gaskets .....		27
A.1	Additional approvals/conformities .....	27
A.2	Hardness measurement .....	27
A.3	Further physical characteristics .....	27
A.4	Storage conditions .....	27
Annex B (informative) Information on the requirements on PTFE gaskets .....		29
B.1	Additional approvals/conformities .....	29
B.2	Physical characteristics .....	29
B.3	Storage conditions .....	30
Annex C (informative) ferrite content .....		31
Bibliography .....		32
Figures Figure 1 -- Type A clamp ferrule .....		13
Figure 2 -- Type B clamp ferrule .....		14
Figure 3 -- Type A gasket .....		14
Figure 4 -- Type B gasket .....		15
Figure 5 -- Type A solid end cap .....		15
Figure 6 -- Type B solid end cap .....		16
Figure 7 -- Type A clamp connection, design KK .....		16
Figure 8 -- Type B clamp connection, design KL .....		17
Figure 9 -- Assembled clamp connections .....		17
Figure 10 -- Surfaces for the visual check of the gasket .....		22
Tables Table 1 -- Symbols .....		8
Table 2 -- Indices .....		8
Table 3 -- Dimensions for clamp connections for series A tubes as in DIN 11866 and series A as in DIN EN 10357 .....		18
Table 4 -- Dimensions of clamp connections for series B tubes as in DIN 11866 .....		19
Table 5 -- Dimensions for clamp connections for series C tubes as in DIN 11866 and series C as in DIN EN 10357 .....		20
Table 6 -- Steel grades .....		21
Table 7 -- Gasket materials .....		21
Table 8 -- Internal and external surface finish of clamp ferrules and solid end caps .....		23

<b>Table 9 -- Acceptance criteria for visual testing of the internal surface .....</b>	<b>24</b>
<b>Table 10 -- Additional acceptance criteria for visual testing of electropolished internal surfaces .....</b>	<b>24</b>
<b>Table 11 -- Marking of clamp connection components .....</b>	<b>25</b>
<b>Table 12 -- Scope of testing per test unit .....</b>	<b>26</b>
<b>Table A.1 -- Storage times for elastomer gaskets as in ISO 2230 Rubber products .....</b>	<b>28</b>
<b>Table B.1 -- Physical characteristics of various PTFE materials .....</b>	<b>29</b>
<b>Table B.2 -- Typical characteristic values of suitable PTFE materials .....</b>	<b>30</b>
<b>Table C.1 -- Typical areas for the formation of ferrite and martensite .....</b>	<b>31</b>
<b>Table C.2 -- ferrite classes for materials 1.4404 and 1.4435 (DF classes) .....</b>	<b>31</b>
