FOREWORD 8
INTRODUCTION 10
1 Scope 11
2 Normative references 11
3 Terms, definitions and abbreviated terms 12
3.1 Terms and definitions 12
3.2 Abbreviated terms 12
4 General requirements 13
4.1 General 13
4.1.1 Capabilities of the Class B "CS" AIS 13
4.1.2 Quality assurance 13
4.1.3 Safety of operation 14
4.1.4 Additional features 14
4.1.5 Modes of operation 14
4.2 Manuals 15
4.3 Marking and identification 15
5 Environmental, power supply, interference and safety requirements 15
6 Performance requirements 16
6.1 Composition 16
6.2 Operating frequency channels 16
6.3 GNSS receiver for position reporting 16
6.4 Identification 17
6.5 AIS information 17
6.5.1 Information content 17
6.5.2 Information reporting intervals 18
6.5.3 Permissible initialisation period 18
6.6 Alarms and indications, fall-back arrangements 18
6.6.1 Integrity and protection 18
6.6.2 Transmitter shutdown procedure 19
6.6.3 Position sensor fallback conditions 19
6.6.4 SOG/COG sensor fallback conditions 20
6.7 User interface 20
6.7.1 Indicators and display 20
6.7.2 Static data input 20
6.7.3 External interfaces 20
6.8 Protection from invalid control commands 21
7 Technical requirements 21
7.1 General 21
7.2 Physical layer 22
7.2.1 General 22
7.2.2 Transceiver characteristics 22
7.2.3 Transmitter requirements 24
7.2.4 Receiver requirements 24
7.3 Link layer 25
7.3.1 General 25

7.3.2 Link sublayer 1: Medium access control (MAC) 25
7.3.3 Link sublayer 2: Data Link Service (DLS) 28
7.3.4 Link sublayer 3: Link management entity (LME) 33
7.4 Network layer 41
7.4.1 General 41
7.4.2 Dual channel operation 41
7.4.3 Channel management 42
7.4.4 Distribution of transmission packets 42
7.4.5 Data link congestion resolution 42
7.5 Transport layer 42
7.5.1 General 42
7.5.2 Transmission packets 43
7.5.3 Sequencing of data packets 43
7.6 Digital selective calling (DSC) 43
8 Test conditions 43
8.1 General 43
8.2 Normal and extreme test conditions 43
8.2.1 Normal test conditions 43
8.2.2 Extreme test conditions 43
8.3 Test signals 43
8.3.1 Standard test signal number 1 44
8.3.2 Standard test signal number 2 44
8.3.3 Standard test signal number 3 44
8.3.4 Standard test signal number 4 44
8.3.5 Standard test signal number 5 44
8.4 Test arrangements 45
8.4.1 Standard test environment 45
8.4.2 Modes of operation of the transmitter 46
8.4.3 Common test conditions for protection from invalid controls 46
8.4.4 Measurement uncertainties 46
9 Power supply, environmental and EMC tests 47
9.1 Test summary 47
9.2 Vibration/shock 49
9.2.1 Vibration 49
9.2.2 Shock 49
9.3 Performance tests/checks 49
9.4 Undervoltage test (brown out) 50
9.4.1 Purpose 50
9.4.2 Method of test 50
9.4.3 Required result 50
10 Operational tests 50
10.1 General 50
10.1.1 Quality assurance 50
10.1.2 Safety of operation 50
10.1.3 Additional features 50
10.2 Modes of operation 51
10.2.1 Autonomous mode 51
10.2.2 Assigned mode 52
10.2.3 Polled mode/interrogation response 53

10.3 Messages extending one time period 54
10.3.1 Method of measurement 54
10.3.2 Required results 54
10.4 Channel selection 54
10.4.1 Valid channels 54
10.4.2 Invalid channels 54
10.5 Internal GNSS receiver 54
10.6 AIS information 55
10.6.1 Information content 55
10.6.2 Information update rates 56
10.7 Initialisation period 57
10.7.1 Method of measurement 57
10.7.2 Required results 57
10.8 Alarms and indications, fall-back arrangements 57
10.8.1 Built-in integrity test 57
10.8.2 Transceiver protection 58
10.8.3 Transmitter shutdown procedure 58
10.8.4 Position sensor fallback conditions 58
10.8.5 Speed sensors 59
10.9 User interface 59
10.9.1 Display 59
10.9.2 Message display 59
10.9.3 Static data input 60
10.9.4 External interfaces 60
11 Physical tests 60
11.1 TDMA transmitter 60
11.1.1 Frequency error 60
11.1.2 Carrier power 61
11.1.3 Transmission spectrum 61
11.1.4 Modulation accuracy 62
11.1.5 Transmitter output power versus time function 63
11.2 TDMA receivers 64
11.2.1 Sensitivity 64
11.2.2 Error behaviour at high input levels 65
11.2.3 Co-channel rejection 65
11.2.4 Adjacent channel selectivity 66
11.2.5 Spurious response rejection 67
11.2.6 Intermodulation response rejection 69
11.2.7 Blocking or desensitisation 70
11.3 Conducted spurious emissions 71
11.3.1 Spurious emissions from the receiver 71
11.3.2 Spurious emissions from the transmitter 72
12 Specific tests of link layer 72
12.1 TDMA synchronisation 72
12.1.1 Synchronisation test sync mode 1 72
12.1.2 Synchronisation test sync mode 2 73
12.1.3 Synchronisation test with UTC 74
12.2 Carrier-sense tests 74
12.2.1 Threshold level 74

12.2.2 Carrier-sense timing 75
12.3 VDL state/reservations 76
12.3.1 Method of measurement 76
12.3.2 Required results 76
12.4 Data encoding (bit stuffing) 76
12.4.1 Method of measurement 76
12.4.2 Required results 76
12.5 Frame check sequence 76
12.5.1 Method of measurement 76
12.5.2 Required results 76
12.6 Slot allocation (channel access protocol) 77
12.6.1 Autonomous mode allocation 77
12.6.2 DSC listening periods 77
12.7 Assigned operation 77
12.7.1 Assignment priority 77
12.7.2 Entering rate assignment 78
12.7.3 Reverting from rate assignment 78
12.7.4 Reverting from quiet mode 78
12.7.5 Retry of interrogation response 78
12.8 Message formats 79
12.8.1 Received messages 79
12.8.2 Transmitted messages 79
13 Specific tests of network layer 79
13.1 Regional area designation by VDL message 79
13.1.1 Method of measurement 79
13.1.2 Required results 80
13.2 Regional area designation by serial message or manually 80
13.2.1 Method of measurement 80
13.2.2 Required result 80
13.3 Management of received regional operating settings 80
13.3.1 Replacement or erasure of dated or remote regional operating settings 80
13.3.2 Channel management by addressed Message 22 81
13.3.3 Invalid regional operating areas 82
13.3.4 Continuation of autonomous mode reporting rate 82
13.3.5 Other conditions 82
Annex A (informative) Results of computer simulations and testing of CSTDMA technology 83
A.1 Computer simulations 83
A.2 Carrier-sense tests 84
A.3 Range tests 85
A.4 Conclusion 85
Annex B (informative) Description of the system 86
Annex C (normative) DSC channel management 87
C.1 DSC functionality 87
C.2 DSC time sharing 87
C.3 DSC functionality tests 88
C.3.1 General 88
C.3.2 Regional area designation 88
C.3.3 Scheduling 88

C.3.4 DSC flag in Message 18 88
C.3.5 DSC monitoring time plan 88
C.3.6 Replacement or erasure of dated or remote regional operating settings 89
C.3.7 Test of addressed telecommand 89
C.3.8 Invalid regional operating areas 90
C.4 DSC receiver tests 90
C.4.1 General 90
C.4.2 Maximum sensitivity 90
C.4.3 Error behaviour at high input levels 91
C.4.4 Co-channel rejection 91
C.4.5 Adjacent channel selectivity 91
C.4.6 Spurious response rejection 92
C.4.7 Intermodulation response rejection 92
C.4.8 Blocking or desensitisation 93
Annex D (informative) Channel management regions 94

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – CLASS B SHIPBORNE EQUIPMENT OF THE AUTOMATIC IDENTIFICATION SYSTEM (AIS) –

Part 1: Carrier-sense time division multiple access (CSTDMA) techniques

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62287-1 has been prepared by IEC technical committee 80: Maritime navigation and radiocommunication equipment and systems.

This third edition cancels and replaces the second edition published in 2010 and Amendment 1:2013. This edition constitutes a technical revision.

This edition includes the following significant technical change with respect to the previous edition: in the synchronisation method, addition of a direct method for synchronisation from an internal UTC source.

The text of this document is based on the following documents:

FDIS	Report on voting
80/837/FDIS	80/842/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 62287 series published under the general title *Maritime navigation and radiocommunication equipment and systems – Class B shipborne equipment of the automatic identification system (AIS)*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "http://webstore.iec.ch" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this document may involve the use of a patent concerning the communication method and system given in 7.3.2.

IEC takes no position concerning the evidence, validity and scope of this patent right.

The holder of this patent right has assured the IEC that he/she is willing to negotiate licences under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of this patent right is registered with IEC. Information may be obtained from:

SRT Marine systems plc

Neil Peniket

Chief Operating Officer

SRT Marine Systems plc, Wireless House, First Avenue, Westfield Industrial Estate, Midsomer Norton, Bath, UK. BA3 4BS

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. IEC shall not be held responsible for identifying any or all such patent rights.

ISO (www.iso.org/patents) and IEC (http://patents.iec.ch) maintain on-line data bases of patents relevant to their standards. Users are encouraged to consult the data bases for the most up to date information concerning patents.

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – CLASS B SHIPBORNE EQUIPMENT OF THE AUTOMATIC IDENTIFICATION SYSTEM (AIS) –

Part 1: Carrier-sense time division multiple access (CSTDMA) techniques

1 Scope

This part of IEC 62287 specifies the minimum operational and performance requirements, methods of testing and required test results for Class B shipborne automatic identification system (AIS) equipment using carrier-sense time division multiple access (CSTDMA) techniques. This document takes into account other associated IEC International Standards and existing national standards, as applicable.

It is applicable for AIS equipment used on craft that are not covered by the mandatory carriage requirement of AIS under SOLAS Chapter V.

An AIS station intended to operate in receive-only mode is not considered a Class B shipborne mobile AIS station.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
