Descriptors:

**ENGLISH VERSION**

**Aerospace series — Measurement methods regarding the lifetime behaviour of light units in a standardized aircraft-related environment**

**Luft- und Raumfahrt —  
Messverfahren zur Bestimmung der  
Lebenszeit von Leuchten in einem  
standardisierten luftfahrzeugnahen  
Umfeld**

**Série aérospatiale — Méthodes de  
mesure du comportement lié à la  
durée de vie des systèmes  
d'éclairage dans un environnement  
normalisé destiné aux aéronefs**

*This "Aerospace Series" Prestandard has been drawn up under the responsibility of ASD-STAN (The AeroSpace and Defence Industries Association of Europe - Standardization). It is published for the needs of the European Aerospace Industry. It has been technically approved by the experts of the concerned Domain following member comments.*

*Subsequent to the publication of this Prestandard, the technical content shall not be changed to an extent that interchangeability is affected, physically or functionally, without re-identification of the standard.*

*After examination and review by users and formal agreement of ASD-STAN, the ASD-STAN prEN will be submitted as a draft European Standard (prEN) to CEN (European Committee for Standardization) for formal vote and transformation to full European Standard (EN).*

*The CEN national members have then to implement the EN at national level by giving the EN the status of a national standard and by withdrawing any national standards conflicting with the EN.*

*ASD-STAN Technical Committee approves that: "This document is published by ASD-STAN for the needs of the European Aerospace Industry. The use of this standard is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."*

*ASD-STAN reviews each standard and technical report at least every five years at which time it may be revised, reaffirmed, stabilized or cancelled. ASD-STAN invites you to send your written comments or any suggestions that may arise.*

*All rights reserved. No parts of this publication may be reproduced, stored in a retrieval system or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without prior written permission of ASD-STAN.*

## Contents

	Page
Foreword .....	3
Introduction .....	4
1 Scope .....	5
2 Normative references .....	5
3 Terms, definitions and abbreviations .....	5
4 Definition of lifetime .....	7
4.1 General .....	7
4.2 Light unit fails .....	7
4.3 The brightness of the light unit falls below a defined limit .....	8
4.4 The chromaticity of the light unit is out of a defined limit .....	8
5 Failure mode identification .....	8
5.1 General .....	8
5.2 Brightness degradation calculation selection .....	8
5.3 Colour degradation .....	8
6 Operating the light unit .....	9
6.1 General .....	9
6.2 Installation orientation .....	10
6.3 Heat sink installation condition .....	10
6.4 Ambient temperature .....	10
6.5 Power supply .....	11
7 Light measurement .....	11
7.1 General .....	11
7.2 Measurement method .....	11
7.3 Measurement uncertainty of long term stability .....	12
7.4 Determination of the start value .....	12
7.5 Measurement intervals .....	12
Bibliography .....	13
