ENGLISH VERSION

**Aerospace series
Sleeving, heat-shrinkable, for binding, insulation and identification
Part 107: Polytetrafluoroethylene (PTFE)
Operating temperatures – 65 °C to 260 °C
Product standard**

**Luft- und Raumfahrt
Wärmeschrumpfender Schlauch zur Befestigung,
Isolierung und Identifizierung
Teil 107: Polytetrafluorethylen (PTFE)
Temperaturbereich – 65 °C und 260 °C
Produktnorm**

**Série aéronautique
Manchons thermorétractables, de jonction,
isolement et identification
Partie 107 : Polytétrafluoroéthylène (PTFE)
Températures d'utilisation – 65 °C à 260 °C
Norme de produit**

This "Aerospace Series" Prestandard has been drawn up under the responsibility of ASD-STAN (The AeroSpace and Defence Industries Association of Europe - Standardization). It is published for the needs of the European Aerospace Industry. It has been technically approved by the experts of the concerned Domain following member comments.

Subsequent to the publication of this Prestandard, the technical content shall not be changed to an extent that interchangeability is affected, physically or functionally, without re-identification of the standard.

After examination and review by users and formal agreement of ASD-STAN, the ASD-STAN prEN will be submitted as a draft European Standard (prEN) to CEN (European Committee for Standardization) for formal vote and transformation to full European Standard (EN).

The CEN national members have then to implement the EN at national level by giving the EN the status of a national standard and by withdrawing any national standards conflicting with the EN.

ASD-STAN Technical Committee approves that: "This document is published by ASD-STAN for the needs of the European Aerospace Industry. The use of this standard is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

ASD-STAN reviews each standard and technical report at least every five years at which time it may be revised, reaffirmed, stabilized or cancelled. ASD-STAN invites you to send your written comments or any suggestions that may arise.

Foreword

This standard was reviewed by the Domain Technical Coordinator of ASD-STAN's Electrical Domain.

After inquiries and votes carried out in accordance with the rules of ASD-STAN defined in ASD-STAN's General Process Manual, this standard has received approval for Publication.
