ENGLISH VERSION

**Aerospace series
Metrological assessment procedure for kinematic fields measured
by digital image correlation**

**Luft- und Raumfahrt
Metrologisches Messverfahren
für kinematische Felder
durch digitale Bildkorrelation**

**Série aérospatiale
Procédure d'évaluation métrologique applicable
aux mesures de champs cinématiques par
corrélation d'images numériques**

This "Aerospace Series" Prestandard has been drawn up under the responsibility of ASD-STAN (The AeroSpace and Defence Industries Association of Europe - Standardization). It is published for the needs of the European Aerospace Industry. It has been technically approved by the experts of the concerned Domain following member comments.

Subsequent to the publication of this Prestandard, the technical content shall not be changed to an extent that interchangeability is affected, physically or functionally, without re-identification of the standard.

After examination and review by users and formal agreement of ASD-STAN, the ASD-STAN prEN will be submitted as a draft European Standard (prEN) to CEN (European Committee for Standardization) for formal vote and transformation to full European Standard (EN).

The CEN national members have then to implement the EN at national level by giving the EN the status of a national standard and by withdrawing any national standards conflicting with the EN.

ASD-STAN Technical Committee approves that: "This document is published by ASD-STAN for the needs of the European Aerospace Industry. The use of this standard is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

ASD-STAN reviews each standard and technical report at least every five years at which time it may be revised, reaffirmed, stabilized or cancelled. ASD-STAN invites you to send your written comments or any suggestions that may arise.

Material Domain

Contents	Page
Foreword	2
1 Scope	3
2 Normative references	3
3 Terms and definitions	3
4 Symbols and abbreviations	4
5 Principle	4
6 System for the assessment of the metrological performance	5
7 Pre-assessment inspection	5
8 Measurement of physical pixel size	6
9 Metrological assessment process	6
10 Classification of the extensometer system	10
11 Uncertainty determination	12
12 Metrological performance assessment intervals for extensometer systems	12
13 Metrological performance assessment certificates	12
Annex A (informative) Uncertainty of measurement	14
Annex B (informative) Classification of the system for the assessment of the metrological performance	20
Annex C (normative) Covariance and covariance matrix	21
Annex D (informative) Template for metrological assessment report	27
Annex E (informative) Alternative approach for optical model identification in the case of monovision measurements	34
Bibliography	36

Foreword

This standard was reviewed by the Domain Technical Coordinator of ASD-STAN's Material Domain.

After inquiries and votes carried out in accordance with the rules of ASD-STAN defined in ASD-STAN's General Process Manual, this standard has received approval for Publication.
